

To Whom it my concern,

I think the attempt to weaken the no call law in Indiana is a invation to our rights to have the telemarketers stop calling. The telemarketers have made calling for sales a real pain in the butt. I don't like the idea of them starting to call my house 40 to 50 time a day again with senseless calls to bother me and my familys evening. If you guy's weaken this law you invading into my rights to have them not call my house. Thank you for your time and I hope you do read this.
